1931

Mr. John A. Wilson, Principal

Originally Erected	1922
Number of Class Rooms	33
Number of Special Rooms	6
Enrollment	1425

## JORDAN JUNIOR HIGH SCHOOL

A two story fireproof building with concrete floors and ceiling and false wood roof with a one story addition of ordinary brick construction.

### DETAILED REPORT

OCCUPANCY: Boiler and fan room, domestic science, laundry, science room, kitchen and lunch room, basement. Offices, auditorium, gymnasium, swimming pool, manual training and class rooms, first. Class rooms, second.

CARE AND MAINTENANCE: Building in good repair, some broken plaster in main entrance, premises neat and orderly.

EGRESS FACILITIES: Fair. Four fireproof stairways from basement to second.

COMMON HAZARDS: LIGHT -- Electric, wiring in rigid conduit, in good condition. HEAT -- Steam from three low pressure boilers in fireproof room, in basement. VENTILATION -- All metal ducts carried through roof.

SPECIAL HAZARDS: WOODWORKING -- Thirteen small machines in addition to benches, refuse cleaned up after each class and removed daily.

METALWORKING -- Twelve small gas torches, safe. PAINTING -- Hand work, small, all paints kept in good metal cabinets.

EXPOSURES: None.

FIRST AID PROTECTION: None except a deficient number of chemical fire extinguishers.

PUBLIC PROTECTION: Good public protection, three double and one triple hydrants conveniently located on six inch water mains and two fire departments within one mile, paved and unpaved streets intervening.

### RECOMMENDATIONS

1. Install a sufficient number of approved 2½ gallon chemical fire extinguishers.
2. Provide an exit from the first floor to the outside at end of corridor adjoining northeast end of auditorium.
3. Install a metal covered trap door at top of stairway to cock loft in storage room.
4. Install a standard waste can for paint rags in metalworking section.

### IMPROVEMENTS COMPLETED

1. Non-standard gasoline can removed from printing shop.
